

Path and border edging system for your garden

LINEFIX® ST path edging system made from recycled PP-PE

Moulded from tough, weather resistant Black recycled polyethylene (PE) and polypropylene (PP), LINEFIX®ST is an economic edging system for paver, block or concrete pathways that conveniently separates the path from flower beds or grassed areas.

Visually unobtrusive and simple to install without having to create a foundation it can be laid in straight or curved lines to follow the landscape design. ST edging can come with optional fixing anchor pegs – see below.
