

Indispensable heat reflecting medical blanket
for emergency use on building sites

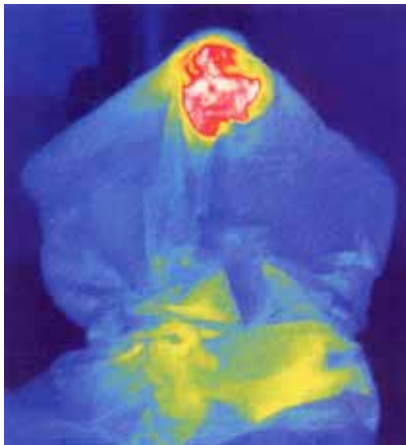

Introduction

The Mediwrap® BS (Building Site) single use blanket has been specially developed to keep accident victims warm. With an absorbent inner liner, they are supplied in a compact lightweight package that is easy to transport and store see below. The proven heat reflecting technology enshrined in this product help keep victim warm whilst providing emergency protection from the elements.

Mediwrap® BS is a simple but highly effective insulation system designed to prevent patient heat loss and associated hypothermia. It also provides high moisture and bodily fluid absorption and is barrier to bacteria. Mediwrap® BS may be used in all anaesthetic and surgical procedures as it is non-conductive and radio-lucent, making it safe for most electro surgical techniques including diathermy, defibrillation and x-ray.
