

The brighter way to insulate

The Benefits of TLX Multi-Foil Insulation

TLX Silver- a thin, flexible multi-foil for roof and wall applications.

Can be used for 100mm and 150mm rafter installations in new build, barn conversion and refurbishment projects including loft extensions (new build in a traditional roof) either over or under rafters.

It works in combination with glass wool to reduce the total thickness of insulation needed and with rigid insulation to cut installation time.

BBA approved, TLX Silver saves time and guarantees 0.2. It stops air leakage by providing an air-tight vapour barrier and restricting air movement in its multi-foil layers

The wall mounted multi-foil which helps builders achieve a better Code for Sustainable Home rating:

- Boosts a typical 100% glass wool solution from a 0.22 U-value (level 3) to a 0.18 U-value (level 4)
- Delivers a simple, non-intrusive solution and doesn't compromise living space
- Enables 140mm stud depth to be maintained
- Is NHBC accepted and LABC approved
- Has an established track record as a performance enhancing solution.
- TLX Silver is certified by the BBA (British Board of Agrément) for use in walls

BBA Certified Product
